

iCombi Pro / iCombi Classic

MobilityLine.

Anywhere, quickly and easily.

MobilityLine.

Anywhere, quickly and easily.

Cooking systems with MobilityLine equipment offer maximum flexibility and mobility for use in catering, banqueting, in party service or marquee operations. Thanks to the smooth and stable castors, tabletop and floor units can easily be moved to various locations. The unit can also be connected very quickly.

The mobile design is also very convenient for conventional kitchens, such as to enable easy floor cleaning in the kitchen. It is no longer necessary to ensure a minimum clearance between cooking systems for maintenance access. This greatly reduces the space required in the kitchen.

The mobile version is available as an optional accessory for all iCombi units, and can be retrofitted by a RATIONAL Service Technician at any time.

❶ MobilityLine floor units models 20-1/1, 20-2/1

A special frame with four robust castors and parking brakes, on which the floor unit is mounted, allows effortless mobility. The mobile oven rack handle is used for this purpose.

The MobilityLine unit comes with:

- › Special frame with four castors and parking brakes

❷ MobilityLine tabletop units models 6-1/1, 10-2/1

The tabletop unit is firmly screwed to stand II MobilityLine. Side bars protect the cooking system and together with the large stable castors, they facilitate mobility.

The MobilityLine unit comes with:

- › Stand UG II MobilityLine
