Safe use.

## SecurityLine.

# Protection against damage and vandalism.

The security versions of the RATIONAL cooking systems can be tailored to your security needs. Typical fields of application include prisons, in which the equipment features offer protection against wilful damage, or which prevent misuse against third parties.

The freely combinable features range from a lockable control panel and cooking cabinet doors and a protective door grill, to retractable handles for mobile oven racks.

The security versions are available as an option for all iCombi Pro and iCombi Classic units (except for iCombi Pro XS 6-2/3).

### ① Lockable control panel

The control panel of the cooking system is protected against vandalism with a robust, almost indestructible cover made from synthetic glass (Lexan). However, the control panel still remains visible even if the cover is closed. On floor units, another cover protects the care drawer and the hand shower. The cover can be secured with a snap latch and padlock, or with an integrated lock.

#### The option contains:

- › Lockable control panel
- › Lockable cover for the hand shower and care drawer (floor units only)

### ② Lockable cooking cabinet door

The cooking systems can therefore only be loaded and unloaded by authorised persons. As an option, floor units can be equipped with a device to open the cooking cabinet door from inside. The core probe is also flexible and cannot be used as a weapon.

#### The option contains:

- › Latch in the control panel cover to lock the cooking cabinet door
- › Unlocking from inside (optional)
- › Flexible core probe

### ③ Safety door

The external glass on the cooking cabinet door is protected against wilful damage by a steel grill. Visibility into the cooking cabinet is ensured even when the door is closed.

#### The option contains:

- › Safety door

### ④ Mobile oven rack with retractable handle model 20-1/1, 20-2/1

The handle for the mobile oven rack is securely mounted and can be retracted under the rack once inserted into the cooking cabinet. This rules out misuse of the handle.

#### The option contains:

- › Mobile oven rack with fixed handle

## Availability for RATIONAL cooking systems

**iCombi Pro /  
iCombi Classic /  
CombiMaster Plus XS**

**SecurityLine tabletop units**  
(Safety door, lockable
