RATIONAL accessories.
Tough. Durable.
Resilient.

Hot. Buttery. Fully loaded.

iCombi accessories can really handle a lot.

Whether they're grill and pizza trays, mobile oven racks, CombiFry baskets, or recirculating hoods, we expect our RATIONAL accessories to be robust enough to withstand tough everyday kitchen use, so that you can enjoy the exceptional performance of the iCombi Pro and iCombi Classic to the fullest. The right accessories ensure pre-fried convenience products, chicken, baked goods, and grilled vegetables turn out perfectly every time. Even steak comes out with perfect grill marks. So you can get the most out of your cooking system. With no stubborn dirt, inconvenient damage or overheated accessories standing in your way.

Durable accessories
So everything turns out just how you pictured it. Again and again.

Grilling and roasting.

Higher productivity, better results.

TriLax coating
RATIONAL's TriLax-coated accessories are designed with grilling, roasting and baking in mind. They feature exceptional heat conductivity, and can be used at temperatures of up to 572 °F. Their robust non-stick coating supports browning.

❶ Roasting and baking tray
The universal tray for meat, fish, poultry, roast potatoes, baked goods, vegetables, and much more. For juicy, delicious food with a beautiful crust.

❷ Grilling and searing plate
For tender, juicy grilled meat, fish, or vegetables. Grilling side creates traditional grill marks; roasting side features a peripheral lip for pan-frying products. The perfect addition to your a-la-carte operations.

❸ Grill and pizza tray
The baking side is perfect for fresh or frozen pizzas and other flatbreads. The grilling side works great on meat, fish, or vegetables.

❹ Multibaker
Perfect portioning and consistent product sizes on fried eggs, omelettes, hash browns, and tortillas.

❺ Diamond and grill grate
Create classic single-stripe grill marks with one side or a steakhouse-style diamond pattern with the other. Extremely robust and long-lasting. No preheating necessary.

❻ CombiGrill
For preparing large quantities of grilled products. No need to preheat the grid.
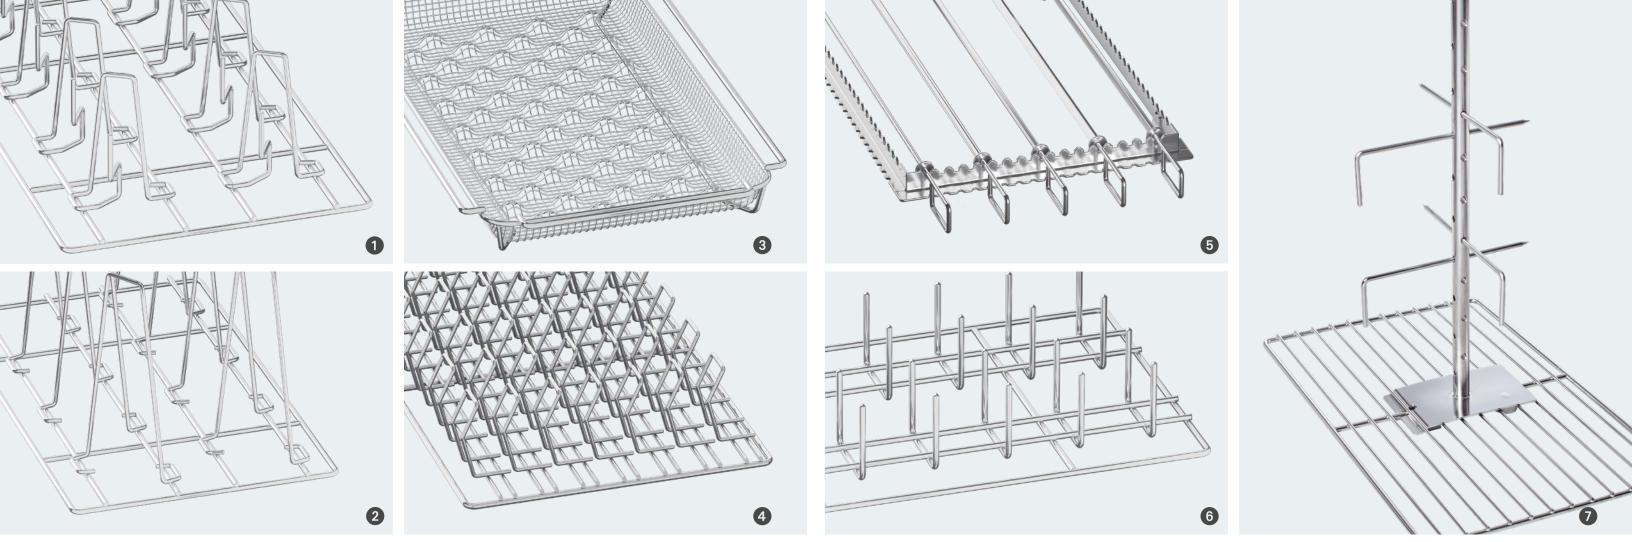

❼ Loading aid
Pairs perfectly with the CombiGrill. For thin grilled products like minute steaks or grilled vegetables. Place the food on the loading aid, then lay it onto the hot CombiGrill and remove later.

❽ Roasting and baking pan
For classic pan dishes like hash browns, tortilla, quiche, pancakes, or small cakes or tarts. Corrugated underside distributes heat quickly. Carrier trays are available for easy handling.

❾ Granite-enameled containers
Fully formed corners, so all portions are equal in size. Their excellent heat conductivity makes them ideal for roasting, braising, pan-frying and baking. Practically indestructible.

(7)

Special applications.

For that little extra something.

❶ ❷ Chicken and duck superspike
Arranges poultry vertically to create a chimney effect, which significantly shortens cooking times. Yields especially juicy breast meat and uniformly browned skin.

❸ CombiFry
Prepare large quantities of pre-fried products like fish sticks, French fries or tater tots without extra oil. Healthy and delicious.

❹ Rib rack
Arranges spareribs vertically to make optimum use of the unit; each grid can hold up to 6 racks.

❺ Grill and tandoori skewers
Skewers of different diameters with round, square or triangular cross-sections, for preparing meat, fish, poultry, or vegetables.

❻ Potato Baker
Prepare baked potatoes without aluminum foil, or corn on the cob up to 50 %* faster.

*compared to conventional cooking technology

❼ Lamb and suckling pig spit
Allows easy preparation of whole lambs or suckling pigs weighing up to 66 lbs.

Baking.

How quality craftsmanship happens.

❶ Muffin and timbale mold
Made of highly flexible material with optimum non-stick properties – perfect for muffins and desserts. 3.4 fl oz filling volume.

❷ Roasting and baking pan
Great for small cakes, such as Tarte Tatin. Corrugated underside helps distribute heat quickly across the entire bottom. With specially shaped carrier trays for easy handling are available.

❸ Roasting and baking tray
The universal baking genius: Hard rolls, croissants, Danishes and more – uniformly browned, crisp crusts, soft and fluffy inside.

❹ Perforated baking tray
Ideal for bread, rolls and pretzels, as well as for producing all types of pre-baked products.

❺ Granite-enameled containers
The corners of the containers are fully contoured to prevent lost portions when baking cakes or brownies. Excellent heat conductivity ensures light, fluffy sheet cakes and uniform browning.

Gastronorm accessories.

Standardized improvement.

❶ Perforated containers
Use this versatile, robust, and durable accessory to steam vegetables, dumplings and other products. Maximum perforation ensures that food steams evenly, preserving its color and nutritional value.

❷ Containers
RATIONAL's stainless-steel containers have walls up to 33 % thicker than standard containers. The thicker walls provide durability, maximum stability even with large fill quantities, and comfortable handling with no sharp edges.

❸ Grid
Perfect for cooking large roasts or supporting smaller containers or sheet pans. Made of extremely stable, long-lasting stainless steel.

## Extras.

Even more possibilities.

❶ VarioSmoker
Delicious smoked flavor without a traditional smoker, directly out of the iCombi Pro. The VarioSmoker gives meat, fish, and vegetables a natural smoked flavor, which you can adjust freely to fit your tastes. Even low-temperature smoking is no problem. Plug and play technology makes it easy to start smoking: the iCombi Pro's intelligent cooking paths regulate the VarioSmoker via a USB connection, to guarantee perfect, professional cooking and smoking results.

❷ Pull-out rails
Allows cooking accessories to be pulled out easily, facilitating quick loading and unloading of food in à la carte operations.

❸ External connectible core temperature probes
The special extra-thin sous vide core temperature probe precisely controls the process of reaching the core temperature within the bag, without disrupting the vacuum seal. Also an external attachable core temperature probe can be used with or in place of the internal core temperature probe.

Finishing.

Separate production and output completely.

❶ Banquet system
Whether you're preparing twenty, one hundred, or several thousand meals, Finishing ensures they'll turn out perfectly with no stress, no hectic rush, and no additional staff. Simply plate the food cold and then store the plates chilled on the mobile plate rack. Then, just before serving, you can bring the plates up to temperature at the same time. The Finishing system includes all the accessories you'll need to get started (mobile plate rack, Thermocover, transport trolley).

❷ Mobile plate rack
Made of high-quality stainless steel, perfectly dimensioned for the units. For quickly loading and unloading up to 120 plates into and out of the iCombi Pro 20-full size (up to 12 1/4" in diameter).

❸ Thermocover
Made of special insulating material to keep food hot for up to 20 minutes after Finishing. Simple magnetic closure for quick opening and closing. Also easy to clean and store.

❹ Run-in rails
Allows quick, ergonomic loading and unloading of mobile oven racks or mobile plate racks. Required for Type 6-half size, 6-full size, 10-half size und 10-full size tabletop units. Run-rails for single units and combi-duos are different.

❺ Transport trolley
Easy loading and unloading of mobile oven or plate racks to and from tabletop units. Large, quiet, hygienic tandem casters ensure safe transport of food. Adjusted to fit stand height. Height-adjustable version for work tables.

❻ Transport trolley for Combi-Duo
Allows both units to be loaded and unloaded safely in a single process. Requires two separate run-in rails for Combi-Duo.

Combi-Duo.

Double the performance, using less space.

❶ Combi-Duo
Two units, simply stacked and combined. When you're grilling and steaming at the same time in a tight space, and your to-do list isn't getting any shorter, you'll have two stacked units at your disposal – and if you prefer, you can control both using the top unit. Greater convenience. Greater flexibility.

❷ Integrated fat drain kit for Combi-Duo
Catches grease reliably as it drips within the cooking cabinets, and directs it into grease collection containers. Different versions available to fit different installation combinations.

❸ Installation options for Combi-Duo
Our high-quality stainless steel stands keep your units secure and aligned.

Installation options:
› Mobile kit with rollers for service access, easy cleaning, and low top rack height, requires a floor drain.
› Stationary installation with Stand I for Combi-Duo. No floor drain required.
› Mobile installation with Stand I for Combi-Duo with swivel casters and locking brake.
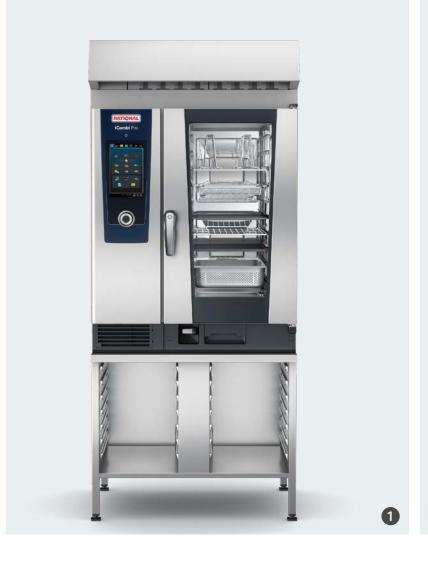

Stands.

Secure. Space-saving. Practical.

❹ Leveling kit and stands
To install your RATIONAL unit safely and keep it level, we offer a variety of stable, high-quality stainless steel stands – open, with closed sides, or fully closed with doors. Supporting rails provide a space-saving storage solution for accessories. The stable casters and locking brakes on our mobile models let you position your unit anywhere in the kitchen. All of our stands conform to applicable hygiene regulations.

For article numbers and additional models, see page 36 and 37.   For article numbers and additional models, see page 38.

Setup options.

Now that's practical.

❶ Integration kit for iCombi Pro XS and CombiMaster Plus XS
This integration kit is perfect for integrating small units into your display cooking area – because looks count. It provides space for a hood, so you can install an UltraVent or an UltraVent Plus, depending on your needs. The kit includes front paneling to prevent dirt and grime from building up in hard to reach areas.

❷ MobilityLine floor units (Type 20-half size, 20-full size)
Floor units can be maneuvered when secured to this special frame with four robust casters and a locking brake.

❸ MobilityLine tabletop units (Type 6-half size – 10-full size)
Tabletop models can be screwed onto the MobilityLine stand II. Handles on either side protect the cooking system and facilitate movement together with the large, stable casters.

Recirculating technology.

For a pleasant working environment.

All recirculating hoods
› have a timeless, modern look
› feature easy-to-clean front panels, including a removable scoop
› regulate their extraction power to fit the situation (when the door is opened, for example) using intelligent, infinitely variable fan speed adjustment. Installation is simple, and retrofitting is always possible.

❶ UltraVent
The UltraVent uses condensation technology to trap steam and vapors. An additional external connection or extension to an existing exhaust air system is not required for this air-recirculation hood.
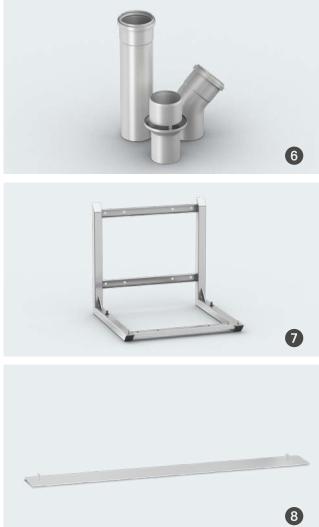

❷ UltraVent Plus
In addition to UltraVent condensation technology, the UltraVent Plus is also equipped with special filter technology to capture and condense steam as well as the bothersome smoke created when grilling and roasting. This allows the placement of RATIONAL units in more demanding environments, such as in front cooking areas.

Installation accessories.

A solution for every challenge.

❶ Trolley ramp
The trolley ramp compensates for kitchen floors that are slanted by up to 3 %, so the mobile oven rack can be rolled into an iCombi Pro floor unit smoothly, with no risk of impact.

❷ Unit and mobile rack elevation
Raises a floor unit by 2 3/4". The mobile rack will need to be adjusted to fit the height of the unit.

❸ Heat shield for left and right side panels
Retrofitting the heat shield allows users to place sources of radiant heat (e.g., grills) near the left or right side panel.

❺ Handle holder for mobile rack
Provides a place to store the mobile rack handle for easy access (included in delivery with floor units).

❻ Condensation breaker
Accelerates expulsion of steam and other vapors from the vent pipe. Steam and vapors can thus be directed through a pipe into an exhaust hood.

❼ Wall mount
For space-saving wall-mounted installation. The anchor and the anchoring material (not included) should be used in consultation with an architect/structural engineer and the building owner for XS and model 6-half size.

❽ Table extension
Prevents dirt and water collection by sealing the protruding underside of the cooking system when installing an iCombi Pro 6-half size or 10-half size on a 27 1/2" deep work surface.

Care products.

Hygienically clean.

❶ Active Green cleaner tabs (for iCombi Pro and iCombi Classic)
Clean unit, clean environment: Our new cleaner tab formula is phosphate- and phosphorous-free, and reduces the quantity of cleaning chemicals required by up to 50 %*. Without compromising on cleaning power or hygiene. Allows ultra-fast interim cleaning of the iCombi Pro in around 12 minutes.

❷ Cleaner tabs (for all SelfCookingCenter and CombiMaster Plus models)
Concentrated, high-yield cleaner tabs with a high-intensity active agent complex to maximize cleaning power.

*compared to the previous model

❸ Care tabs (for iCombi Pro, iCombi Classic and SelfCookingCenter models with Efficient CareControl)
Care substances provide active protection against limescale in the steam generator and the cooking cabinet before they can even develop, which extends the life of the unit. Reliable operation without water softening and expensive descaling.

❹ Rinse aid tabs (for SelfCookingCenter models without Efficient CareControl and CombiMaster Plus)
Active protection and extended product life thanks to highly effective care substances. The cooking cabinet is left hygienically clean and sparkling.

❺ Defoamer tabs (for all iCombi Pro, iCombi Classic, SelfCookingCenter and CombiMaster Plus models)
Reduces foam generated when using water that tends to foam heavily.

❻ Grill cleaner (for all CombiMaster and ClimaPlus Combi models)
Liquid detergent for hygienic cleanliness and care.

❼ Special detergent – soft (for all CombiMaster and ClimaPlus Combi models)
Non-corrosive detergent for cleaning after cooking at temperatures under 392 °F.

❽ Liquid rinse aid (for ClimaPlus Combimodels with CleanJet)
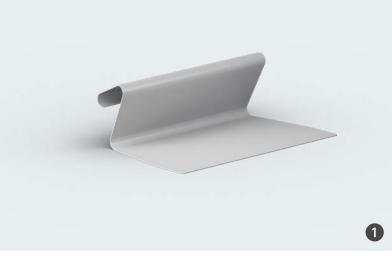

❾ Descaler (for SelfCookingCenter models without Efficient CareControl, CombiMaster, ClimaPlus Combi)
Special care substances provide effective descaling of the steam generator.
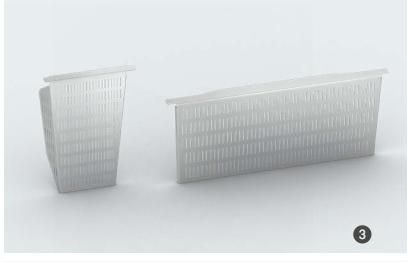

❿ Hand spray gun
Made of durable plastic; robust and easy to use.
The integrated pump mechanism generates pressure so that you can spray liquid detergent or rinse aid wherever you need it with just a push of a button.

Practical. Robust. Essential.

The right ingredients for iVario.

Efficiency and simplicity, creativity and variety, quantity and quality – iVario accessories need to do a lot. And withstand a lot. That's true of our boiling and frying baskets, our pan base racks, our VarioMobils, and our scoops. And only those that meet our high standards can call themselves RATIONAL accessories. So you'll always be sure that you can get the cooking results you want. So that your pasta, stews, and desserts really will turn out perfectly. And so the cleaning crew has as little to do as possible.

⊘ **The recipe**
   Sophisticated accessories that make work easier and produce quality results.

22

The basis for everything.

So that you can work more quickly, more efficiently, more ergonomically.

❶ Spatula
Easy, ergonomic tool for turning and removing food. Also perfect for rolling and handling desserts and egg dishes, such as pancakes, crepes, and omelets. Sophisticated design – lightweight, yet stable.

❷ Scoop
Durable, reinforced, and heat resistant for safe and easy portioning. Light, impact resistant, scratch resistant, and withstands temperatures of up to 482 °F. Available in perforated or solid.

❸ Strainer
Strainers to hold back loose boiled products while liquid is being drained out. Attach the Strainer to the front of the pan. Liquid can be drained using the integrated pan valve, or the pan can be tilted to catch the liquid.
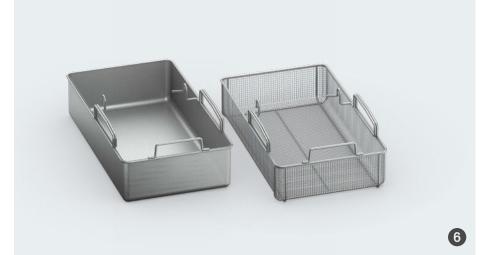

❹ Pan base rack
Used to avoid direct contact between food and pan base, such as for low temperature cooking. Set the rack on the bottom of the pan and then place the food onto it.

❺ Arm for automatic raising and lowering
The arm for the automatic lifting and lowering mechanism is attached to the lid. AutoLift lifts the products out of the cooking liquid. Boiled, fried, and poached food comes out perfectly cooked. The iVario Pro XL holds up to three large boiling or frying baskets.

❻ Boiling and frying baskets
Attach the baskets to the automated lifting and lowering arm, and then load them. At the end of the cooking process, the basket is lifted out of the cooking liquid automatically, draining the product and allowing for easy unloading. Also suitable for smaller products like rice. Nothing needs to be poured out, so water can be reused multiple times.

Special applications.

The high art of cooking.

❶ Portion basket kit
Kit with perforated or solid portion baskets 1/6 GN, including lids (for non-perforated baskets only) and frame. The frame can hold 1/3, 1/6, and 1/9 GN containers. Perfect for boiling, deep-frying, or holding small quantities of food in restaurants, hotels, and the service industry. Place the frame directly on the edge of the pan. Lids prevent the products from cooling and forming a skin.

Transport.

From A to B, effortlessly. And back again.

❶ VarioMobil
The 1/1 model can be set to four different heights. The handle is foldable to save space when storing the VarioMobil. The 2/1 model can be set to two different heights for more ergonomic use.

❷ Basket cart
For easy and safe storage, transport, and draining of hotel pans, GN containers or up to three boiling or frying baskets. Stops at the end of the racks prevents baskets and containers from slipping out during transport.
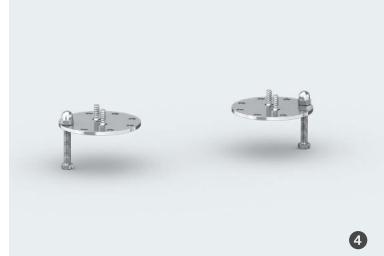

Stands.

Now that's versatility.

❶ Stands
The iVario 2-XS and the iVario Pro 2-S can be installed directly on a stand. With integrated pullouts to hold containers, making it easy to empty the pan. With supporting rails for storing GN containers and accessories. Can be placed flush with the wall. Side panels and top closed, rear panel open. Different setup options including feet, stainless steel feet or casters.

❷ MarineLine stand
The seaworthy MarineLine stand for the iVario 2-XS and the iVario Pro 2-S has locking support rails for storing gastronorm containers safely. Side panels and top closed, rear panel open. Can be installed flush with the wall. Stainless-steel feet can be welded or bolted to the floor, ensuring that the cooking system cannot slip or tip. Requires unit anchoring kit.

❸ Stands with electric height adjustable feet
The height of this stand for the iVario 2-XS and the iVario Pro 2-S is infinitely adjustable (by up to 7 7/8") to provide an ergonomic working height. Easy to operate via the cooking system display. Integrated pull-out shelves hold containers to make unloading the pan easier. Support rails for storing GN containers and accessories. Closed side walls, top, and back. Flexible drain hose included.

Installation.

More space. More safety.

❶ Rear panel
Closes the back part of the base and covers cable and wastewater installations to make cleaning easier. Can be combined with all base variations. Can be retrofitted.

❷ Storage cabinet
Allows efficient use of the space underneath the iVario Pro L or XL. Consists of up to nine pairs of supporting rails. Closed side walls, top, and back. Can be combined with all base variations. Can be retrofitted.

❸ Floor anchoring kit
Improve work safety by securing the iVario Pro L or XL cooking systems on the floor easily. Depends on the device size.

❹ Unit anchoring kit
For mounting an iVario 2-XS or iVario Pro 2-S to an existing work surface or a stand. Provides secure horizontal and vertical anchoring. Compatible with installation options using 3 1/2" plastic feet.

For article numbers and additional models, see page 41.
For article numbers and additional models, see page 41.

Care products.

Shiny clean. Perfectly hygienic.

❶ Grill cleaner
For minor pan discoloration that is difficult to remove using ordinary detergent (from tomato sauce, for example). Can be used undiluted. Rinse thoroughly afterward.

❷ Cleaning arm, incl. 4 pads
Helps with cleaning difficult-to-reach exterior areas between pan and control panel on the iVario 2-XS and iVario Pro 2-S. The kit includes a cleaning arm as well as four cleaning pads of two different hardness levels.

❸ Cleaning pads, rough
Follow-up order of cleaning arm for exterior cleaning. Helps with stubborn, caked-on grime.

❹ Cleaning pads, soft
Follow-up order of cleaning arm for exterior cleaning.

❺ Cleaning scrub
For fast, effective cleaning of the inside of the pan. For all unit sizes.

For article numbers and additional models, see page 41.

Grilling, roasting, and baking.

WiFi

ConnectedCooking.

Keep an eye on everything.

➡ **ConnectedCooking**
High-performance networking by RATIONAL. So you'll always have everything under control.

rational-online.com/us/ConnectedCooking

Networking is on the rise – everything's digital, everything's coordinated. Just like ConnectedCooking by RATIONAL. Recipe transmission, unit inspections, hygiene data, software updates, service remote access – our secure networking solution lets you do everything from your desk. On all of your networked units. You can also access and save HACCP data from all units. Or send new recipes remotely with just a click of your mouse. All you need is a PC, a smartphone, or a tablet.

RATIONAL cooking systems can include built-in WiFi, or add a RATIONAL WiFi adapter to different device generations. This extends your network, even with a weak WiFi signal. Networking has never been easier.
